

IN THE CLAIMS

Please amend the claims as follows:

1. - 13. (Canceled)

14. (Currently Amended) A method for soliciting or placing at least one order for golf shoes, comprising the steps of:

- providing at least one computer;
- providing an order form through the at least one computer to be accessed by at least one user from a remote site;
- measuring the size of the user's foot to provide a size parameter using a device connected to the computer network;
- providing a first parameter selected from the group consisting of cleat type and personalization;
- providing a second ~~at least one additional~~ parameter selected from the group consisting of traction level, ~~cleat type, personalization, and~~ cushioning, ~~and combinations thereof;~~
- entering the first and second parameters ~~at least one additional parameter~~ on the order form;
- submitting the order form through the computer network; and
- receiving the golf shoes according to each parameter in the order form.

15. (Previously Presented) The method according to claim 14, wherein the step of measuring the size further comprises providing at least one of a laser-sizing device, a photographic-sizing device, or a graduated-sizing device.

16. (Previously Presented) The method according to claim 14, wherein the step of providing at least one computer further comprises providing a first computer at a store location and a second computer at a warehouse in communication with the first computer.

17. (Previously Presented) The method according to claim 14, wherein the step of providing at least one computer further comprises providing a third computer at a manufacturing facility in communication with the first and second computers.

18. – 26. (Canceled)

27. (Previously Presented) A method for soliciting or placing at least one order for golf shoes, comprising the steps of:

- providing at least one computer;
- providing an order form through the at least one computer to be accessed by at least one user from a remote site;
- providing at least one measuring device connected to the at least one computer for measuring a size parameter;
- inputting the size parameter on the order form;
- entering a cleat type on the order form;
- submitting the order form through the at least one computer; and
- receiving the golf shoes according to each parameter on the order form.

28. (Previously Presented) The method of claim 27, wherein the step of providing at least one computer further comprises providing a first computer at a store location and a second computer at a warehouse in communication with the first computer.

29. (Previously Presented) The method of claim 28, wherein the step of providing at least one computer further comprises providing a third computer at a manufacturing facility in communication with the first and second computers.

30. (Previously Presented) The method of claim 27, wherein the step of providing at least one measuring device further comprises providing at least one of a laser-sizing device, a photographic-sizing device, or a graduated-sizing device.

31. (Previously Presented) The method of claim 27, further comprising the step of providing the footwear according to the order form by manufacturing the footwear at a manufacturing facility at a location different from the remote site.
32. (Previously Presented) The method of claim 27, further comprising the steps of:
selecting an insole material; [[and]]
selecting an outsole material; and
inputting the insole material and outsole material on the order form.
33. (Previously Presented) The method of claim 27, further comprising the step of:
selecting a cushioning type, wherein the choices of cushioning comprise rubber
plugs, air plugs, gel cushions, foam, or mixtures thereof; and
inputting the cushioning type on the order form.
34. (Previously Presented) The method of claim 27, further comprising the steps of:
providing a custom indicia;
choosing the custom indicia application method from the group consisting of
punching, embroidering, printing, and inscribing; and
inputting the custom indicia application method on the order form.
35. (Previously Presented) A method for placing an order for golf shoes, comprising the steps of:
providing at least one computer;
providing an order form through the at least one computer to be accessed by a
user from a remote site;
measuring the user's foot size to provide a size parameter using a device
connected to the computer;
providing a custom indicia;
submitting the order form through the computer network; and
receiving the golf shoes according to each parameter in the order form.

36. (Previously Presented) The method of claim 35, wherein the step of providing a custom indicia further comprises the steps of:

selecting a custom indicia application method; and
inputting the custom indicia application method on the order form.

37. (Previously Presented) The method of claim 36, wherein the custom indicia application method is selected from the group consisting of punching, embroidering, printing, and inscribing.

38. (Previously Presented) The method of claim 35, further comprising the step of:
selecting a cushioning type, wherein the choices of cushioning comprise rubber
plugs, air plugs, gel cushions, foam, or mixtures thereof; and
inputting the cushioning type on the order form.

39. (Previously Presented) The method of claim 35, further comprising the step of:
selecting an insole material;
selecting an outsole material; and
inputting the insole material and outsole material on the order form.

40. (Previously Presented) The method of claim 35, further comprising the step of:
selecting a material treatment from the group consisting of a temperature
responsive treatment, stain-proofing, pattern, and water-proofing; and
inputting the material treatment on the order form.

41. (Previously Presented) The method of claim 27, wherein the cleat type comprises metal or plastic.

Please add the following claims:

42. (New) The method of claim 14, wherein the step of selecting a second parameter further comprises the step of:

selecting a cushioning type, wherein the choices of cushioning comprise rubber
plugs, air plugs, gel cushions, foam, or mixtures thereof; and

inputting the cushioning type on the order form.

43. (New) The method of claim 14, wherein the step of selecting a first parameter further comprises the steps of:

- providing a custom indicia;
- choosing the custom indicia application method from the group consisting of punching, embroidering, printing, and inscribing; and
- inputting the custom indicia application method on the order form.

44. (New) The method of claim 14, further comprising the step of:

- selecting a material treatment from the group consisting of a temperature responsive treatment, stain-proofing, and water-proofing; and
- inputting the material treatment on the order form.

45. (New) The method of claim 14, wherein the step of providing a second parameter comprises:

- selecting a traction level from the group consisting of ridges, grooves, and projections; and
- inputting the traction level on the order form.

46. (New) The method of claim 14, wherein prior to the step of receiving the golf shoes, the method further comprises the steps of:

- translating the size, first, and second parameters into manufacturing control data;
- and
- using the manufacturing control data to create the golf shoes.

47. (New) The method of claim 27, wherein prior to the step of receiving the golf shoes, the method further comprises the steps of:

- translating each parameter into manufacturing control data; and
- using the manufacturing control data to create the golf shoes.

48. (New) The method of claim 35, wherein prior to the step of receiving the golf shoes, the method further comprises the steps of:

translating each parameter into manufacturing control data; and
using the manufacturing control data to create the golf shoes.
